

## **JOB DESCRIPTION**

**Job Title:** Research Scientist  
**Designation:** Professional 2  
**Work Unit:** Biodiversity North  
**Position number:** 200116  
**Responsible to:** P3 – 9944 Senior Scientist, Biodiversity North

### **Primary Objective**

To undertake and coordinate research on developing landscape metrics and monitoring for biodiversity conservation in the Daly region.

### **Key Responsibilities**

1. Undertake research to develop landscape metrics and monitoring protocols associated with land clearing impacts and biodiversity conservation in the Daly region.
2. Undertake field research and supervise others in the field.
3. Undertake statistical and spatial analyses of the biodiversity data.
4. Write scientific reports and journal articles.
5. Collaborate with other Northern Territory Government staff working on land clearing regulations and monitoring.
6. Engage with landholder and other stakeholder groups.

### **Selection Criteria**

#### **Essential:**

1. Relevant postgraduate degree.
2. Substantial experience in landscape ecology.
3. Demonstrated experience in the writing of reports and/or journal articles.
4. Demonstrated experience working effectively in teams.
5. Demonstrated capability for managing projects and budgets.
6. Demonstrated experience and capability in communicating research results and management advice to a diverse range of peoples.
7. Current driver's licence.

#### **Desirable:**

1. Knowledge of north Australian environments and their biota.
2. Experience in organising logistics and remote-area field survey, including the operation of 4WD vehicle.
