Do you struggle with the amount of time it takes to write? When writing about science it is easy to drift away from your key topic when researching, planning and writing. Dr Marina Hurley shows you how to stay on track and be more efficient at each stage of the writing process. Irrespective of your topic, background, level of writing experience or document type, you can implement these steps to develop your first draft or rework a current document.

### Learn how to

- Get your thoughts down quickly and manage your time effectively
- Avoid key behaviours leading to inefficient writing
- Focus and develop your core topic in your first draft
- Effectively manage your writing project and monitor your productivity
- Produce a content-rich first draft of a new document over the course of four weeks

### Course structure

- Four modules are delivered over four weeks, plus live Q&A sessions
- Each module contains 3-4 lessons plus additional training resources
- Complete at your own pace (12 month access).
